AIR

MERSEBURG AIRFIELD, 1 Feb - 24 Mar 56

1. GROUND RADIO/RADAR

- (a) The canvas covered aerials on a hill near KNAPENDORF are still in position. No further details are yet available.
- (b) Attached at Appendix "A" is a sketch of the radar station at PB 069 943, about 300 metres from the road between MERSEBURG and KNAPENDORF.
- (c) The following observations have been made:-
 - i) Four complete revolutions in one minute, followed by revolutions in the opposite direction after two minutes.
 - ii) On other occasions the aerial was suddenly stopped and went back from 180°, stopped again and then slowly continued its revolution in the same direction. After a moment it had taken up its normal speed again.

The above observations were made on three occasions between 7 - 24 March 56, between 1100 - 1620 hrs.

- (d) When at rest the umbrella type reflector is inclined downwards at an angle to the ground. Sketch 2 on APPENDIX "A".
